ACCOUNTING POLICIES

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the organisation's policies and constitution. The annual financial statements have been prepared on the historical cost basis, and incorporate the principal accounting policies set out below.

These accounting policies are consistent with the previous period.

1.1. Property, plant and equipment

Property, plant and equipment are tangible items that:

- a) are held for use in the production or supply of goods and services, for rental to others or for administrative purposes; and
- b) are expected to be used during more than one period.

Cost includes all costs incurred to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Depreciation is provided using the straight-line method to write down the costs, less estimated residual value over the useful life of the property, plant and equipment, which is as follows:

Item	Average useful lives
Computer equipment	3 years

1.2. Revenue

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the entity has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably
- it is probable that the economic benefits associated with the transaction will flow to the entity; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Donations received are recognised as income once they have been received by the entity

1.3. Financial Instruments

Financial instruments carried on the balance sheet include cash and bank balances and trade receivables. These instruments are generally carried at their fair value.
